Факторизованная грамматика для интерпретатора лямбда-выражений

1 Грамматика

```
Терминальные символы \Sigma = \{ \setminus, . , (\ ,) \ , [a-zA-Z], [0-9], \_ \ , let \ , = , \setminus n \}
```

Нетерминальные символы $N = \{ program, definition, term, term', lambda-abstraction, variable, letter, digit <math>\}$

Стартовый символ $S = \{programm\}$

1.1 Правила

```
\begin{split} &\langle program\rangle ::= \langle definition\rangle \{ \backslash n\langle program\rangle \} \mid \langle term\rangle \{ \backslash n\langle program\rangle \} \\ &\langle definition\rangle ::= let \ \langle variable\rangle = \langle term\rangle \\ &\langle term\rangle ::= \langle term'\rangle [\backslash s] \langle term\rangle \mid \langle term'\rangle \\ &\langle term'\rangle ::= \langle lambda - abstraction\rangle \mid \langle variable\rangle \mid (\langle term\rangle) \\ &\langle lambda - abstraction\rangle ::= \backslash \langle variable\rangle \{ \ \langle variable\rangle \}. \langle term\rangle \\ &\langle variable\rangle ::= \langle letter\rangle \{ \langle letter\rangle \langle digit\rangle \} \\ &\langle letter\rangle ::= a|...|z|A|...|Z \\ &\langle digit\rangle ::= 0|1|2|3|4|5|6|7|8|9 \end{split}
```
